- 8. Is the website thoroughly tested and free of errors.**  
This object has been met.  
Yes, there are no errors

### Recommendations for future development

Mr. Basil's recommendation for future developments include having automatic resize of the website to fit the device it's on. For example, a specific size when opened in tablets, and different in computers. Therefore it can be user-friendlier. Moreover another improvement is adding an online shop for fundraising products of Earth Club. Users could order online and Earth Club can deliver it to provide more service. However, to do this Earth Club needs to consider costs and time required to deliver the products and also setting bank accounts for users to pay online. The benefits of a shop in the other hand, can increase the interest of users to the website, and can also be a major source of funding for Earth Club.
